SCOTTISH NATURAL HERITAGE

SCIENTIFIC ADVISORY COMMITTEE

SNH Scientific Publications 2014-2015

Summary

1. This paper provides a bibliography of scientific papers produced by and on behalf of SNH since 2014.

Action

2. This is an information paper, although Kamila Fraser would welcome any additions which the committee notice are inadvertently omitted from the list.

Preparation of paper

3. Kamila Fraser and David O’Brien prepared this paper. It is sponsored by Ian Bainbridge.

Background

4. A review of SNH scientific publications from 2007 to mid-2014 was presented at the September 2014 SAC meeting. This paper updates the Committee on publications since then.

5. This list includes all environment-relevant peer-reviewed papers, formally-published reports, books, chapters, and theses, which result from work linked to SNH. Staff may be authors, but papers from SNH-commissioned contract work and PhD publications with no SNH author are also included.

6. We ask staff to list publications resulting from:
   - Professional and personal work by staff,
   - work commissioned by SNH,
   - work supported by SNH in cash or kind and
   - work carried out by others on SNH-managed NNRs.

7. We recognise that publishing is a route that allows staff to both develop and achieve recognition amongst their peers. We would also like to acknowledge the support of SAC and Expert Panel members.

8. This list does not include SNH Commissioned Research Reports – they are collated and listed through their own system and available on the SNH website.
