

YOUR **DOG**
DOESN'T
KNOW ANY
BETTER.

MAKE SURE
YOU DO.

One minute I'm enjoying a runabout in the countryside, the next I see a field of fluffy white things and I come over all strange. Normally I reserve the teeth for my rubber bone and the odd delicious pig's ear. But quick as a flash I'm in the field and those white fluffy things are looking awfully chewy. If he hadn't got my collar I'm telling you I really don't know how that walk would have ended. Talk about animal instincts.

LIVESTOCK. Keep your dog on a short lead around livestock and during bird breeding season (usually April-July). Never let it worry or attack livestock or disturb nesting birds.

PLANTED FIELDS. Avoid taking your dog into fruit and vegetable fields unless there is a clear path.

CATTLE. Keep yourself and your dog at a safe distance as cattle can act aggressively.

DOG WASTE. Pick up and dispose of carefully.
